## BUILDING LABORATORIES NEED NOT BE STRESSFUL

Does the excitement of a new laboratory soon turn into a depressing experience?

Many vendors, hundreds of moving parts, and thousands of decisions demanding your attention can drain you in no time.

## CHOOSE A SMARTER WAY

Wipe out your woes and enjoy risk-free, budget-controlled, and on-time projects.

## KEQUIP TURNKEY ENGINEERING LABORATORY SOLUTIONS

Drawing from our multi-geography and multi-industry experience, we offer the most hassle-free way to build and operate your next lab.

Starting with consulting and through lab facility management, our services offer you a stress free and productive journey.

## YOUR SINGLE WINDOW FOR ALL YOUR LABORATORY PROJECTS

Our team of dedicated professionals bring combined experience of over 50 years of industry experience to offer a proven path with your next laboratory project. Our portfolio of turnkey solutions offer you a major leap over other options available in the market.

### CONSULTING

- Project design
- Detailed engineering
- PMC
- Industry 4.0 technologies

### DESIGN & ENGINEERING

Detailed Engineering encompassing Laboratory Design on;

- Space Management
- MEP & Utilities
- Complete Equipment portfolio
- Integration of Equipment with Infrastructure, Data, LIMS
- Safety
- Digital Lab Monitoring, etc

All as per Global Standards / Licensors Methods / Country specific Standards

### BUILD & COMMISSION

- Laboratory infrastructure: Clean rooms, caseworks, fume hoods, storage/safety cabinets, LAF, glove box, etc
- MEP works: HVAC, exhaust systems, gas distributions system (GDS), electrical systems, plumbing, drain, data cabling and more
- Safety systems - Laboratory health monitoring systems, fire alarm systems (FAS), public address systems (PA), personal safety utilities (eye wash and body shower)
- Laboratory Information Management System - LIMS
- Application & Method based Laboratory Equipment / Instrument, Laboratory Chemicals, Glassware etc

### FACILITY MANAGEMENT

- Flexible and tailored program
- Resource augmentation to full-outsourcing options
- Choice of people, product, and process management
- Robust and proven governance program

### LEARNING & DEVELOPMENT

- Standard operating procedures (SOP) setup
